

KARYOMAX™

FOR HEALTHY AND RAPID SHRIMP GROWTH

No more dreams Jumbo Shrimp - Now a reality

KARYOMAX™

Best in controlling
white gut and
running mortality

An innovative product from **Karyotica Biologicals**

Shrimp growth depends on digestibility of the feed and the bio-availability of the nutrients. An increased bio-availability of the nutrients contained in the shrimp feed will have a positive effect on the growth and performance of cultured shrimp. It also helps in feed conversion efficiency and survival. The anti-nutrient factors (ANFs) present in the feed must be digested for efficient release of nutrients and harmful bacteria present in the shrimp gut must be controlled for rapid growth and healthier shrimp.

KARYOMAX™

This can be achieved by introducing a carefully chosen mix of herbal and enzymatic feed additives for improving the digestibility of the complex feed. We are proud to introduce an innovative solution to achieve this goal which is developed by our technology partners Karyotica Biologicals, Hyderabad, India by several years of intensive research. The outcome of such intensive research is KARYOMAX™ which is efficient in digesting the feed rapidly, making the nutrients bio-available and further controlling harmful bacteria in the gut, leading to rapid growth and improved health of the shrimp. KARYOMAX™ further provides significant relief from white gut syndrome and running mortality by controlling the sloughing of intestinal microvilli and enhancing the hepato-pancreatic health of the shrimp.

Regular use of KARYOMAX™ accelerates the growth of shrimp by manifolds and results in visibly healthier shrimp saving the culture costs and increasing profits.

Field Level Results with KARYOMAX™

In a series of field trails conducted with KARYOMAX™ we have observed steady reduction

of running mortality by at least 10% while average body weight gain has gone up by 25 to 30%. We have observed an increase in the total yield by 1625 kilograms per hectare on an average. In other words the benefits are around USD 7935 per hectare per crop and achieved 40 count 15 days before the general schedule in the area considered for the trials.

Contents: Enzymes, Amino Acids, Herbal Extracts, Stabilizers, Proprietary growth promoting factors and Minerals

Benefits of KARYOMAX™

- 🐟 Rapid feeding
- 🐟 Ensures faster body weight gain
- 🐟 Ensures healthy shrimp
- 🐟 Improves FCR
- 🐟 Improves the digestibility of the feed
- 🐟 Lowers feed costs
- 🐟 Improves shrimp quality
- 🐟 Reduces pond bottom litter and sludge
- 🐟 Controls white gut
- 🐟 Controls running mortality

DOSE: 2- 3 kg of KARYOMAX™ per ton of feed

Method of Application: Dissolve the contents in suitable quantity of water and spray on the feed uniformly. Dry for 15 to 30 minutes and use for feeding the shrimp.

Do not use any Gels or Binders

Manufactured by:
Karyotica Biologicals Pvt. Ltd.

Plot No: 69, Vittal Rao Nagar, Madhapur, Hyderabad-500081
